Pull the class materials

Open a terminal in your mcdb170.lsit.ucsb.edu JupyterLab server.

The following command will clone the repository of the class materials.

```
$git clone https://github.com/sungsoo-ucsb-classrooms/MCDB170-Materials.git

(Use your github username and a personal token, not password, to clone if asked)
```

The class materials are now in the MCDB170-Materials directory.

To pull a newly uploaded class materials, run the following commands.

```
$  cd MCDB170-Materials    (that is, you move to the repository directory)
$  git pull
```

Note: You can't commit or push your modification. This repository is only for pull.
